一、	Egg.js 无人点餐项目功能介绍	1
_,	桌号管理相关数据库表	2
三、	qr-image 生成桌号二维码	2
四、	node-canvas 合成图片	3

一、Egg.js 无人点餐项目功能介绍

二、桌号管理相关数据库表

三、qr-image 生成桌号二维码

https://www.npmjs.com/package/qr-image

```
1、安装模块
npm install qr-image

2、引入模块
const qr = require('qr-image');

3、生成二维码图片
var img = qr.image('http://www.itying.com', { type: 'png'});
this.ctx.status = 200;
this.ctx.type = 'image/png';
this.ctx.body = codeImg;
```

四、node-canvas 合成图片

https://www.npmjs.com/package/canvas

```
const fs = require('fs')
const path = require('path')
const Canvas = require('canvas')
const Image = Canvas.Image
const canvas = Canvas.createCanvas(509, 714)
const ctx = canvas.getContext('2d')
const img1 = new Image()
img1.onload = () => {
    //绘制第一个图片
    ctx.drawImage(img1, 0, 0)
    //图片上面绘制字体
    ctx.font = '28px "Microsoft YaHei"';
    ctx.fillStyle = "#ffffff";
    ctx.fillText('一层 02', 200, 340)
    //图片上面绘制图片
    const img2 = new Image();
    img2.onload = () => {
         ctx.drawlmage(img2, 170, 360)
         canvas.createPNGStream()
              .pipe(fs.createWriteStream(path.join(__dirname, 'image-src-url.png')))
    img2.src = "images/code.png"
img1.onerror = err => {
    console.log(err)
}
img1.src = "images/bg.png"
```
